

Question	Answer	Marks	Guidance
2(a)(i)	thermostatic(ally controlled) water-bath / AVP ;	1	
2(a)(ii)	<i>any two from:</i> mass of apple ; volume of, pectinase / enzyme (solution) ; time / left for 30 minutes ;	2	
2(b)(i)	axes labelled with units ; suitable linear scale and data occupies at least half the grid in both directions ; all points plotted accurately $\pm$ half a small square ; suitable line drawn ;	4	
2(b)(ii)	any indication on graph at 0.5% pectinase concentration / indication of correct value on the volume axis ; correct value recorded from candidates graph ;	2	
2(b)(iii)	increasing, concentration / pectinase , increases juice production and then stops increasing / AW ;	1	
2(b)(iv)	more concentrations measured between 0.4% and 1.6% ;	1	A smaller intervals above and below, 0.8% e.g. 0.7% and 0.9% A smaller intervals around 0.8%
2(b)(v)	<i>drawings of:</i> funnel with filter paper ; measuring cylinder ; <i>labelling:</i> at least one item correctly labelled ;	3
