

3 A space station orbits above the Earth. There is an astronaut in the space station.

In the space station, the acceleration of free fall is 7.5 m/s^2 .

On Earth, the acceleration of free fall is 9.8 m/s^2 .

Which row about the astronaut's mass and weight in the space station is correct?

	mass of astronaut	weight of astronaut
A	same as on the Earth	less than on the Earth
B	same as on the Earth	greater than on the Earth
C	lower than on the Earth	less than on the Earth
D	lower than on the Earth	greater than on the Earth
