

- (c) The table lists some of the variables used in the program.

Complete the table by writing the most appropriate data type for each variable.

Variable	Use of variable	Data type
MemberCount	stores how many members have used the sports centre each day	
TotalTakings	stores the total amount of money taken each day	
BookingConfirmed	stores the state of a booking for an exercise class; a booking is either confirmed or not confirmed	
MemberDOB	to calculate when to send an email with a birthday message to a member
