

(b) The character '\ ' has been chosen as a separator.

Explain why this is a suitable character.

.....
..... [1]

(c) Two new information items are to be stored for each member. Both new items are encrypted; they can each contain any character (including '\ ') and can be of any length up to a maximum of 99 characters.

For example:

Information item	Example data
member 1 ID	"AB1234"
member 1 name	"Freddie Jones"
member 1 email address	"FreddieJ909@Cambridge.org"
member 1 new information 1	"En/98&* (? \ / D 7 i P"
member 1 new information 2	"23\CoboL"

Explain the additional file design changes needed so that:

- all the information items for each member are stored on a single line of `NewFile.txt`
- it is possible to extract each information item after the line is read.

Assume the '\ ' character is not used in any email address.
