

- (ii) The methods `GetCode()` and `GetValue()` return the appropriate attribute.

Write program code for `GetCode()` and `GetValue()`

Save your program.

Copy and paste the program code into part **1(a)(ii)** in the evidence document.

[3]

- (iii) The table shows the code and value of **five** board objects. The table has the variable identifier where each of the objects are stored.

Variable identifier	Code	Value
Object1	"A"	2
Object2	"B"	3
Object3	"C"	5
Object4	"D"	2
Object5	"E"	7

Write program code for the main program to instantiate each of the **five** board objects and store them in the variables with the identifiers given.

Save your program.

Copy and paste the program code into part **1(a)(iii)** in the evidence document.
