

- 22** Two springs X and Y stretch elastically. The graphs show the variation with extension x of the force F applied to each spring.

Which statement is correct?

- A** When each spring is given the same extension, the energy stored in Y is 4 times the energy stored in X.
 - B** When each spring is given the same extension, the energy stored in Y is 8 times the energy stored in X.
 - C** When the same force is applied to each spring, the energy stored in Y is 4 times the energy stored in X.
 - D** When the same force is applied to each spring, the energy stored in Y is 8 times the energy stored in X.
- 23** Which phrase describes the strain at the elastic limit on a stress–strain graph?
- A** the maximum strain below which Hooke's law is obeyed
 - B** the maximum strain below which the deformation is plastic
 - C** the minimum strain above which Hooke's law is obeyed
 - D** the minimum strain above which the deformation is plastic
