

- 5 A cuboidal block floats in a liquid with its base horizontal, as shown in Fig. 5.1.

Fig. 5.1

The base of the block is at a depth h below the surface of the liquid.

The block is displaced downwards by a small distance and then released so that it oscillates.

Fig. 5.2 shows the variation with h of the acceleration a of the block.

Fig. 5.2

Fig. 5.3 shows the variation with h of the kinetic energy E_K of the block.

Fig. 5.3
