

- 2 (a) (i) State what is represented by a gravitational field line.

.....

.....

..... [2]

- (ii) The Earth may be considered as a uniform sphere, as shown in Fig. 2.1.

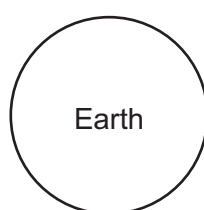

Fig. 2.1

On Fig. 2.1, draw field lines to represent the Earth's gravitational field outside the Earth. [2]

- (b) The Earth's magnetic field may be considered as being due to the Earth acting as a long solenoid, as shown in Fig. 2.2.

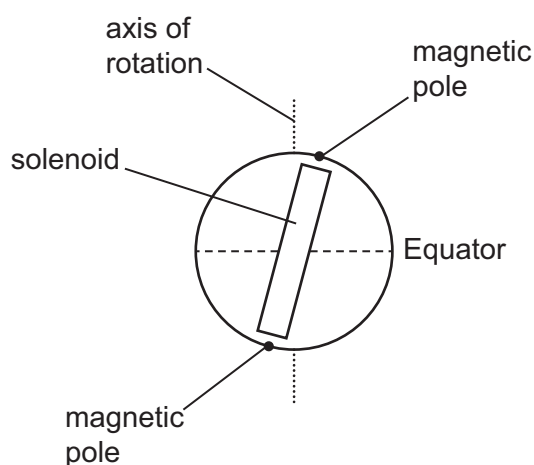

Fig. 2.2

The magnetic poles do not align with the geographic poles, which are on the axis of rotation.
