

- 7 The velocity–time graph for an object is shown.

Which expression gives the total displacement of the object?

- A** area 1 – area 2
- B** $\frac{(\text{area 1} + \text{area 2})}{2}$
- C** area 1 + area 2
- D** area 2 – area 1
- 8 Which statement describes the weight of an object?
- A** It is equal to the mass of the object multiplied by its acceleration.
- B** It is equal to the resultant force when the object falls at terminal (constant) velocity.
- C** It is the force acting on the object due to a gravitational field.
- D** It is the property of the object that resists change in motion.
- 9 What is a statement of the principle of conservation of momentum?
- A** In an elastic collision, momentum is constant.
- B** Momentum is the product of mass and velocity.
- C** The force acting on a body is proportional to its rate of change of momentum.
- D** The momentum of an isolated system is constant.
