

- 31 Two light sources are used to produce an interference pattern.

Interference fringes appear when the two sources emit waves that are coherent.

What is meant by coherent waves?

- A The two waves are emitted with the same frequency.
- B The two waves are emitted with constant phase difference.
- C The two waves are emitted with the same intensity.
- D The two waves are emitted with zero phase difference.

- 32 Which component has the I – V graph shown?

- A filament lamp
- B metallic conductor at constant temperature
- C resistor of fixed resistance
- D semiconductor diode
