

You may not need to use all of the materials provided.

2 In this experiment, you will investigate the deformation of paper cylinders.

(a) You have been provided with two pieces of paper.

The width of a piece of paper is the length w of the shorter side, as shown in Fig. 2.1.

Fig. 2.1

- Select the **smaller** piece of paper.
- Measure and record w .

$w =$ cm

- Roll the paper into a cylinder and use two paper clips to hold the paper in place, as shown in Fig. 2.2.

Fig. 2.2

- The diameter of the cylinder is d , as shown in Fig. 2.2.

Adjust the paper and paper clips until d is as close as possible to 7.0 cm.

- Measure and record d .

$d =$ cm
