

- (b) (i) • Set up the apparatus as shown in Fig. 2.3.

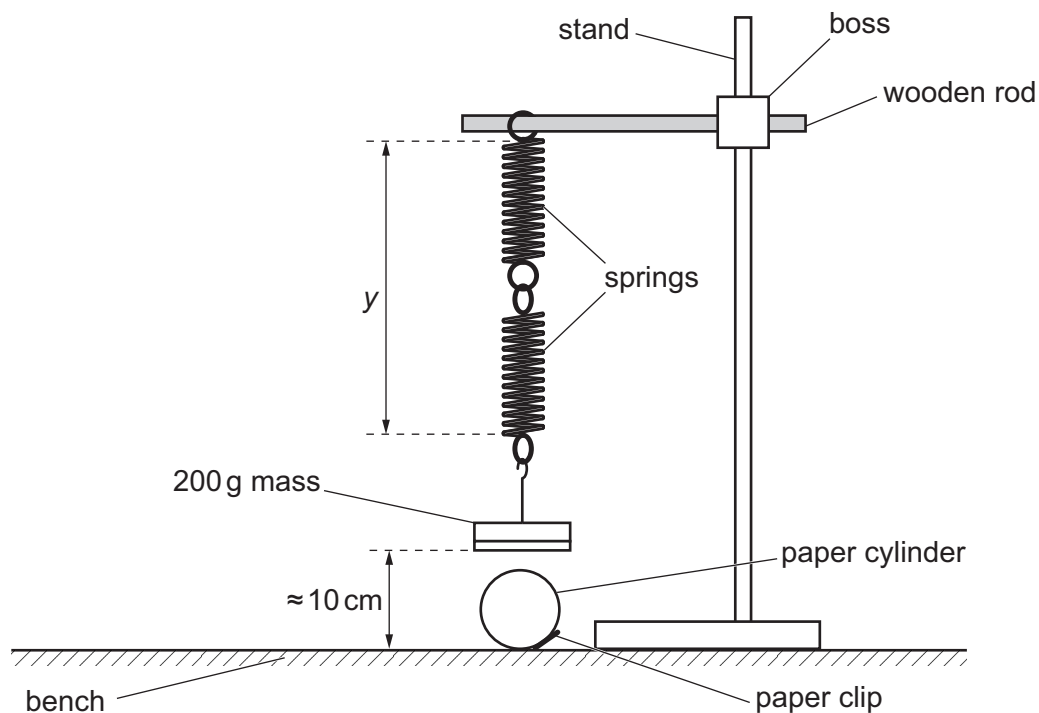

Fig. 2.3

- Slide the loop of the upper spring onto the wooden rod.
- Hang a mass of 200 g from the lower spring.
- Adjust the height of the boss until the bottom of the mass is approximately 10 cm above the bench.
- Place the paper cylinder so that the middle of the cylinder is under the mass, as shown in Fig. 2.3.
- The length of the springs is y , as shown in Fig. 2.3.

Measure and record y .

$y = \dots\dots\dots$ cm [1]
