

You may not need to use all of the materials provided.

1 In this experiment, you will investigate the oscillations of a pendulum on a board.

- (a) • Fix the string of the pendulum onto the nail using some of the adhesive putty, as shown in Fig. 1.1.

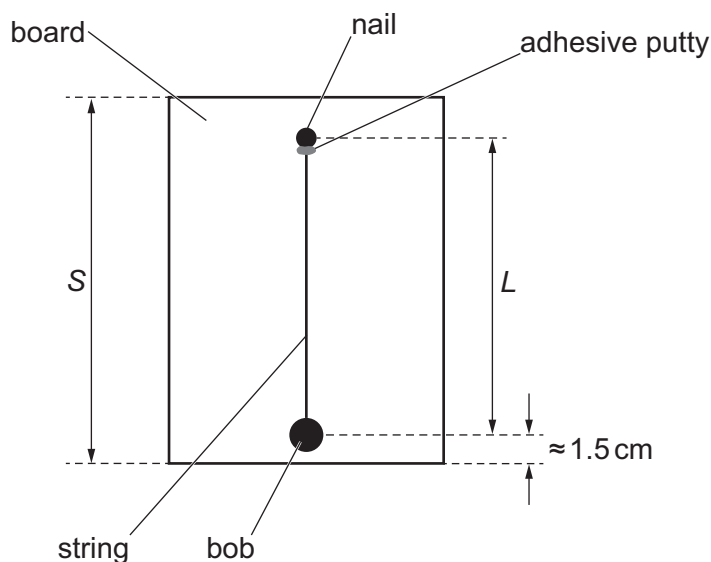

Fig. 1.1

- The distance between the two edges of the board is S , as shown in Fig. 1.1.

The length L of the pendulum is the distance between the centre of the nail and the centre of the bob.

Adjust the length of the pendulum by wrapping the string around the nail so that the centre of the bob is approximately 1.5 cm from the edge of the board.

- Measure and record S and L .

$S =$ cm

$L =$ cm
