

You may not need to use all of the materials provided.

- 1 In this experiment, you will investigate the phase difference between the oscillations of two mass–spring systems.

- (a) • Assemble the apparatus as shown in Fig. 1.1.

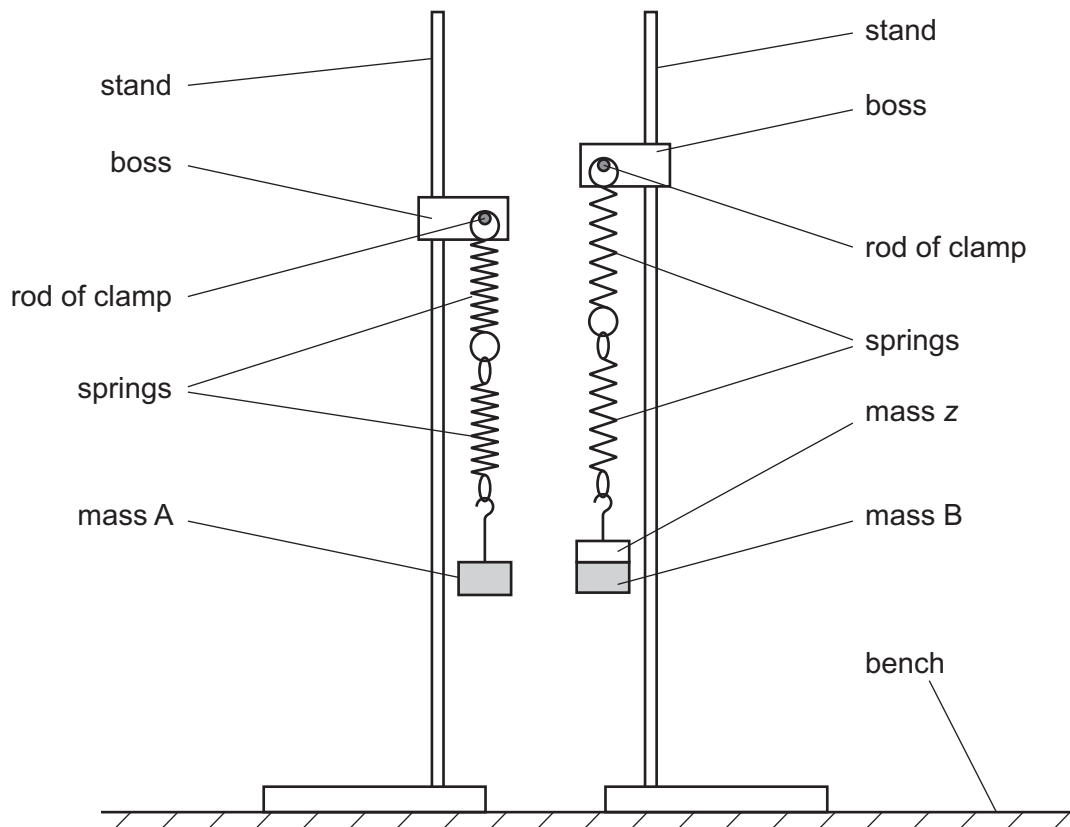

Fig. 1.1

- Mass A and mass B are each 200 g.
- Add a mass z of 40 g to mass B.

Record the value of z.

$z = \dots\dots\dots$ g

- M is given by $M = 200 \text{ g} + z$.

Calculate M .

$M = \dots\dots\dots$ g
