

- (iv) Determine the y -intercept of the line of best fit. Include the absolute uncertainty in your answer.

y -intercept = [2]

- (d) Using your answers to (a), (c)(iii) and (c)(iv), determine the values of λ_0 and H . Include appropriate units.

λ_0 =

H = [2]

- (e) Hubble's law suggests that the age T of the universe is related to H by

$$T = \frac{1}{H}.$$

Determine a value for T . Include the absolute uncertainty in your answer.

T = s [2]

[Total: 15]
