

- (d) An echo check is used to check for errors after the image has been transmitted.

Draw and annotate a diagram to show how the echo check would detect any errors.

[3]

- (e) The image data is encrypted using symmetric encryption.

- (i) Tick (✓) **one** box to show the correct statement about symmetric encryption.

- A** Encrypted text is known as plain text.
- B** The most secure form of encryption.
- C** The encryption key is shared with any device receiving the encrypted data.
- D** Two different keys are used.
