..... [3]

- (d) The self-driving tractor has an in-built expert system that the farmer can use to solve any errors with the tractor.

Identify **three** components of an expert system.

1

2

3 [3]

- (e) At the end of each day the self-driving tractor transmits the data it has collected to the farmer's computer in their house.

The transmission uses an echo check.

- (i) Describe the role of the self-driving tractor and the farmer's computer in the echo check.
