

2 **Four** descriptions of programming concepts and **five** programming concepts are shown.

(a) Draw **one** line to link each description to the most appropriate programming concept.

Not all programming concepts will be used.

Description	Programming concept
a subroutine that may not return a value	function
a value that is declared and used within a specific procedure	procedure
a value that a procedure expects you to supply when it is called	parameter
	global variable
a subroutine that will always return a value	local variable

[4]

(b) Write the pseudocode to use a procedure named *Average* that passes the values 25 and 50 to the procedure.

.....
..... [2]

(c) Outline the role of procedures and functions in creating a program that is easier to maintain.
