

- 7 An algorithm has been written in pseudocode to find and display the maximum and minimum values in an array of 1000 positive numbers. The array `List[]` starts at index 1

```

01 Max ← List[1]
02 Min ← List[1]
03 FOR Counter ← 2 TO 1000
04     IF List[Counter] < Max
05         THEN
06             Max ← List[Counter]
07     ENDIF
08     IF List[Count] < Min
09         THEN
10             Min ← List[Counter]
11     ENDWHILE
12 NEXT Counter
13 OUTPUT "Maximum value is ", Max
14 OUTPUT "Minimum value is ", Min

```

- (a) Give a line number for each of these types of statement:

Assignment statement

Selection statement

Iteration statement

[3]

- (b) Identify the line numbers of the **three** errors in the pseudocode and suggest a correction for each error.

Error 1 line number

Correction

.....

Error 2 line number

Correction

.....

Error 3 line number

Correction

.....

[3]
