

6 Data can be encrypted using asymmetric encryption.

(a) Complete the paragraph about asymmetric encryption.

Use the terms from the list.

Some of the terms in the list will **not** be used. You may use a term more than once.

algorithm	binary	cipher text	compression	error
hardware	hexadecimal	meaningless	plain text	private
public	readable	transmission	unreadable	

Data is encrypted using an encryption key. This is a type of

that scrambles the and turns it into

..... . This makes the data

A key is used to encrypt the data. This key cannot be used

to decrypt the data. A key is used to decrypt the data. Any

device is able to request the key, but only your device

knows the key.

[8]

(b) Data can also be encrypted using symmetric encryption.

Give **one** reason why a person would use asymmetric encryption instead of symmetric encryption.
