

- (b) The swap section in lines 11 to 13 of the existing code are to be changed to a call statement for a procedure. This procedure will include two parameters representing the indexes of the array elements to be swapped.

- (i) Complete the pseudocode for PROCEDURE Swap

PROCEDURE Swap (.....)

 DECLARE Hold : REAL

 Hold ← Values[.....]

ENDPROCEDURE

[4]

- (ii) Write the pseudocode to transfer control to PROCEDURE Swap

.....

..... [2]

- (c) Explain the difference between global variables and the variable declared in 3(b)(i).

.....

.....

.....

..... [2]
