

(iii) Give **one** disadvantage of the computer using Unicode instead of ASCII.

.....
..... [1]

(e) The report is broken down into packets to be emailed.

(i) Circle **three** items of data that can be found in the packet header.

- | | | |
|---------------------|----------------------|------------------|
| trailer | originator's address | payload |
| interrupt | input | operating system |
| destination address | antivirus | packet number |

[3]

(ii) Each packet is sent along a different path from the employee's device to the employer's device.

Tick (✓) **one** box to show the name of this method of sending packets.

- | | |
|------------------------------|--------------------------|
| A packet networking | ☐ |
| B packet circuiting | ☐ |
| C packet switching | ☐ |
| D packet transferring | ☐ |

[1]

(iii) A hardware device is used to control the path that each packet takes.

Give the name of this hardware device.

..... [1]

(f) The email data is checked for errors after it has been transmitted, using an echo check and a checksum.

(i) Explain how the echo check is used to check for errors in the email data.
