

# Electrochemistry

A Level Chemistry · Vocabulary

| English                      | 中文      | Pinyin                      |
|------------------------------|---------|-----------------------------|
| electrolysis                 | 电解      | diàn jiě                    |
| electrolyte                  | 电解质     | diàn jiě zhì                |
| electrode                    | 电极      | diàn jí                     |
| cathode                      | 阴极      | yīn jí                      |
| anode                        | 阳极      | yáng jí                     |
| Faraday constant             | 法拉第常量   | fǎ lā dì cháng liàng        |
| Avogadro constant            | 阿伏伽德罗常量 | ā fú gā dé luó cháng liàng  |
| electrode potential          | 电极电势    | diàn jí diàn shì            |
| standard electrode potential | 标准电极电势  | biāo zhǔn diàn jí diàn shì  |
| standard hydrogen electrode  | 标准氢电极   | biāo zhǔn qīng diàn jí      |
| standard cell potential      | 标准电池电势  | biāo zhǔn diàn chí diàn shì |
| oxidising agent              | 氧化剂     | yǎng huà jì                 |
| reducing agent               | 还原剂     | huán yuán jì                |
| half-equation                | 半反应方程式  | bàn fǎn yìng fāng chéng shì |
| feasibility                  | 可行性     | kě xíng xìng                |
| Nernst equation              | 能斯特方程   | néng sī tè fāng chéng       |
